

## (SENIOR) PACKAGING ENGINEER (F/M/D)

### YOUR TASKS

Do you have an inquiring mind and enjoy developing innovative ideas? Can you inspire other people and motivate them to achieve common goals? Then join us as a project manager for international packaging projects and focus on our client and consumer needs.

- Representing Global Packaging Development, you'll work together closely with our Marketing, Research and Development, and Supply Chain units on global launch/relaunch projects, developing new packaging systems and optimizing existing solutions.
- You'll leverage your innovative strengths and drive for execution to consistently set new standards for design, functionality, and costs.
- You'll also put manufacturing and filling processes for existing packaging solutions under the microscope, identifying and pursuing opportunities for optimization (costs, quality, efficiency).
- Of course, you'll track the market and the competition, too, and will share your findings in your work and with the team.

### YOUR PROFILE

- Degree in engineering (e.g. packaging engineer)
- Several years working in a similar position in packaging development, but at a minimum solid initial experience of packaging (gained through a junior position, for example)
- A proven track record in project and process management
- A sure command of moderation and presentation techniques
- Excellent team working abilities and strong communications skills
- Fluent English; additional languages are an advantage

We are open to candidates with a more junior profile to whom we would offer a Packaging Specialist position with a two years contract.

### ADDITIONAL INFORMATION

You are welcome to apply without a cover letter. If you would like to attach a cover letter, please upload it with your resume. We look forward to receiving your application including a compelling curriculum vitae with relevant references and certificates.

If you have any questions, please contact our recruiter Regine Siebe every Wednesday between 1 and 2 pm via the telephone number: +494049094956.
