

LAN & WLAN NETWORK ENGINEER

At Beiersdorf, we want to help people feel good about their skin – and our commitment goes far beyond caring for skin. For 140 years, we have developed innovative skin and body care products for well-known brands such as NIVEA, Eucerin, La Prairie, Hansaplast, and Labello. We act according to our purpose, WE CARE BEYOND SKIN, and take responsibility for our consumers, our employees, the environment and society.

Behind every brand, every product and every accomplishment are our more than 20,000 employees. It is for them that we live an inclusive culture of respect and trust that is strongly aligned with our values – CARE, COURAGE, SIMPLICITY and TRUST. We also embrace diversity by valuing the uniqueness of each individual and being committed to equal opportunities for all.

YOUR TASKS

- Configure, install, and maintain network devices: Cisco switches (9300, 9400, 9500 series), Wireless LAN Controller (9800 series), Wireless Access Points (9100 series)
- Configure and manage Cisco Identity Services Engine (ISE) for network access control, including policy enforcement and authentication services.
- Perform network hardware lifecycles in the region.
- Implement and manage dynamic routing protocols, particularly OSPF
- Troubleshoot and resolve network issues related to LAN and WLAN connectivity, performance, and security.
- Perform regular network maintenance tasks, including software upgrades and patch management.
- Document network configurations and procedures.
- Stay updated on emerging Cisco technologies and best practices, recommending innovative solutions to enhance network capabilities.
- Collaborate with other network colleagues and ITO departments to ensure network solutions meet user/business needs.

YOUR PROFILE

- Bachelor's degree in Computer Science, Information Technology, or related field.
- Minimum of 5 years of experience in operational routine 2nd level support on Cisco switching products, specifically on Catalyst series.
- Demonstrated experience with Cisco switches (9300, 9400, 9500 series), Wireless LAN Controller (9800 series), Wireless Access Points (9100 series) in an enterprise environment.
- Minimum of 5 years of experience in designing, implementing, and managing WLAN, Radius, NAC, and Cisco ISE solutions in enterprise-level environments.
- In-depth understanding of network security principles, including authentication, authorization, access control, and network access control (NAC).
- Experience with PRIME and DNA Center platforms.
- Excellent troubleshooting skills and ability to identify and resolve complex network issues.

ADDITIONAL INFORMATION

At Beiersdorf, we embrace Diversity and aim to provide equal opportunities to all of our applicants – regardless of e.g. gender, sexual identity, nationality, ethnicity, religion or ideology, disability or age. We would therefore kindly ask you to include only information and data in your documents which are relevant for the assessment of your application (e.g. curriculum vitae with relevant references and certificates). For instance, please feel free to upload your CV without a picture.
