

**BEIERSDORF'S PALM-BASED RAW MATERIALS SUPPLY CHAIN**  
**2020 LIST OF POTENTIALLY CONNECTED MILLS**

At Beiersdorf we rely on natural raw materials for the ongoing development of our product formulas. Many ingredients which are essential for the production of our cosmetic products contain palm-based raw materials. As a global skin care company we do not purchase palm (kernel) oil directly but mainly use palm-based derivatives and fractions, further processed substances based on palm (kernel) oil. Our annual requirement of palm-based ingredients in 2020 was around 28,000 tonnes, which is equivalent to 0.04 % of global palm oil production.

Beiersdorf strives to take a leading position with regard to sustainability in the palm supply chain. We have already implemented our ambitious Sustainable Palm Roadmap in 2010 and achieved our 2020 target of using 100% sustainably certified palm (kernel) oil and its derivatives based on the Mass Balance model of the Roundtable on Sustainable Palm Oil (RSPO).

Driving supply chain transparency and risk mitigation is a key pillar of our Sustainable Palm Roadmap. In contrast to the crude palm (kernel) oil supply chain, the palm derivatives supply chain is very complex and involves a wide range of different supply chain parties. We purchase our palm-based raw materials from oleochemical suppliers and thus have only an indirect influence on our upstream supply chain. Nevertheless, achieving sustainability in the palm derivatives supply chain is of fundamental importance to us.

However, we know that the reach of our actions as an individual company is limited. We therefore collaborate proactively with peers and supply chain partners and have co-founded the "Action for Sustainable Derivatives" (ASD) initiative to support this. ASD, as independent third party, conducts an in-depth investigation of our palm supply chain on an annual basis and traces back our derivatives to identify our key sourcing areas.

In 2020, we identified 920 individual mills that are potentially connected to 92% of our palm-based raw material volumes with a high probability. These mills are listed below and are located in the following countries: Indonesia (58 %), Malaysia (39 %), Thailand, Colombia and others (3 %).

The findings from our palm supply chain investigation build the base for our risk assessment and selection of smallholder and landscape projects in key sourcing countries. Furthermore, it enables us to engage with our direct and indirect suppliers to ensure they comply with our Sustainable Palm Policy and 2025 targets.

The disclosed palm oil mills list is correct to the best of our knowledge at the time of publication. We have made considerable effort to validate the data but cannot guarantee its full accuracy or completeness. Therefore, Beiersdorf makes no representation or warranty as to the accuracy and completeness of any third-party information contained herein.
